

Alexandra Primary School

Voluntary Contributions for 2021

Library fund (tax deductible)

The library will form part of the resource centre in the new area of the school. We see the space as an easy to use resource area with comfortable and functional seating, accessible book shelving, ICT for research and inviting activities for use on hot or rainy lunch times. Donations to this fund may go towards, student requested reading material, new iPads to name a few.

Building fund (tax deductible)

Most of our school is now in a very new and very good condition. Contributions to the building fund could make improvements to existing older learning and resource areas such as the sports shed, Art room, multipurpose room and canteen area. Items could include painting or new carpet.

IT Upgrade

Contributions to the IT Upgrade fund gives the school an opportunity to purchase or lease additional devices if required, as well as procure IT applications that may enhance delivering curriculum. Previous contributions have assisted in the purchasing of 60 new Chromebooks.

Sustainability Program

Any contributions provided to the sustainability program will go directly towards making improvements to our garden area. The students have an opportunity to get involved in maintaining this space, teaching them valuable hands on skills and creating an environment that is child centred. Tools, plants and chickens have been purchased this year.
